much like vladimir lenin his onetime rival for the leadership of the bolshevik party during its formative years alexander bogdanov 1873 1928 was a visionary in two science fiction novels set on mars bogdanov imagined a future in which the workers of the world liberated from capitalist exploitation create a physiological collective that rejuvenates and unites its members through regular blood exchanges but bogdanov was not merely a dreamer he worked tirelessly to popularize and realize his vision founding the first research institute devoted to the science of blood transfusion in a martian stranded on earth the first broad based book on bogdanov in english nikolai krementsov examines bogdanov s roles as revolutionary novelist and scientist presenting his protagonist as a coherent thinker who pursued his ideas in a wide range of venues through the lens of bogdanov s involvement with blood studies on one hand and of his fictional and philosophical writings on the other krementsov offers a nuanced analysis of the interactions between scientific ideas and societal values

everyone knew the story of kastory impan the first martian on earth or did they excerpt if this account reaches the eyes of martians and may seem to them rather boastful and impertinent i give them this reason i have written spaceship this in answer to markin lavlo s book martian superiority it is merely a gentle reminder that beyond the remarkable flight of the first martian we tellurians can claim to be the pioneers of space it must not be thought that we of earth in any way minimize the great and historical space flight of the pioneer far from it we are as quick in our homage to his dead body and everlasting spirit in the museum at the spot of landing as his fellow martians themselves the foregoing has prepared the reader for the story of the arrival of kastory impan the first martian or the pioneer whose name is held today in reverence by the peoples of two great worlds there are numerous other accounts

of the arrival but none have gone back into the past to show the connection between scientific research in transmutation and interplanetary flight a point i think directly connected to the first space flight and subsequent establishment of commercial relationship it is true that without the flight of dr sven s ship the earth would still be as far ahead the martians would still have come but that does not detract from the honor and glory forever associated with the names of professor wilhelm riehlm the founder of the science of transmutation and dr jarl svens who developed it i challenge martia the super race of mars to bring up a scientist to compare with either of these two and i may add that quite by accident i came across the little sub plot which goes with story of the arrival of the first martian i m certain no one ever heard of gregory stewart before
