the cytochemical bioassay system was described in a short abstract in 1971 and more fully in the cytochemical bioassay of corticotrophin in 1972 since then cytochemical bioassays have been described for several polypeptide hormones and these assays are already widely used it is expedient that the subject should be reviewed as it is in this monograph by one writer

who has had the good fortune to have taken part in the growth of cytochemistry from its early origins to its present position as the basis of possibly the most sensitive bioassay system currently available however it should be noted that major contributions have been made by many both to the development of the subject and to the establishment of the bioassays the object of this preface is to try to give some perspective to the growth of this subject and to record that the cytochemical bioassay system has been fostered by many outstanding scientists in an atmosphere of remarkable goodwill to begin with there could have been no cytochemical bioassays until cytochemistry had been converted from its rather unsure origins into a precise and quantitative form of cellular biochemistry this was done with skill and enthusiastic dedication by my colleagues dr lucille bitensky dr f p altman dr r g l w poultter and mr a a silcox first at the royal college of butcher dr

principles of perinatal neonatal metabolism second edition assembles a stellar international group of contributors to examine the various aspects of metabolism in the human adult during pregnancy in the fetus and in the newborn completely updated and revised with more than 17 new chapters the book is divided into five sections 1 methodology and general principles 2 maternal metabolism during pregnancy 3 fetal placental metabolism 4 organ specific metabolism during the perinatal period 5 neonatal metabolism new to the second edition are discussions of methodologies using molecular biology techniques expanded coverage of central nervous system metabolism and an entirely new section on organ specific metabolism that is organized by organ system a must for every physician who cares for the pregnant patient and her child from reviews of the critically acclaimed first edition an incredible amount of information of utmost value not only to the basic investigator but also to the clinician jama a first rate reference textbook that should be on the shelves of every institution that provides care for the pregnant women or her children nejm i know of no other volume in which these important topics are integrated into a single text i enthusiastically recommend it as a valuable reference to researchers clinicians fellows and students tem
